

WHAT DO THESE DRUGS HAVE IN COMMON?

THEY ARE ALL

- Narcotics
- Highly addictive
- Made from morphine (opium)

MOST FREQUENTLY PRESCRIBED DRUGS WITH OPIUM

- Hydrocodone
- Lorcet
- Lortab
- Oxycodone
- OxyContin
- Percocet
- Percodan
- Vicodin

**WOULD YOU KEEP HEROIN IN A
MEDICINE CABINET OR PURSE WHERE
YOUR CHILDREN COULD GET IT?
ALWAYS KEEP **NARCOTICS** UNDER
LOCK AND KEY.**

Many heroin users started with Vicodin or Oxycodone.
Once addicted to prescription drugs, users often
switch to heroin-easier to get and cheaper.
